

EZPC VOIP/PSTN switch for headsets

EZPC VOIP/PSTN switch for headsets (HAH-EZPC)

The EZPC enables hassle-free switching between traditional telephone call and VOIP softphone calls, and means there is no need to change your existing headsets in order to make the move towards Unified Communications.

Features

- Switch easily between desk and soft phone using the same headset
- Compatible with all leading desk & soft phone brands
- Compatible with any 4p4c headset or handset
- Compatibility switch and sound card, no need for a third party intelligent/smart USB cord
- LED light clearly shows connection status
- Rubberised feet and sensible weighting increase tabletop stability
- Supplied with colour coded lead for ease of use
