

USB Buddy Training Adaptor

USB Buddy training adaptor (HADUSB)

USB technology does not allow the simple connection of two VoIP/softphones, which presents a problem for side-by-side training on headsets. The USB Buddy overcomes this limitation on VoIP calls with the use of two standard wired headsets.

Features:

- Enables side-by-side training for softphone (VoIP telephony) users
- Automatic connection when plugged into PC USB port
- Push to mute for Trainer and/or Trainee using easily visible mute buttons
- Ideal for small VoIP conferences
- Also useful as USB adaptor for all standard headsets with mute and training facility
- USB2 performance on VoIP connection

Specifications:

- Colour: Black
- Weight: 46g
- EAN number: 5055386500212
